EDUCATION

Ph.D. : **Metallurgical and Materials Engineering, Middle East Technical University, Ankara, TURKEY, June 2003.**

Dissertation : Production of Bulk Metallic Glasses

Advisor : Prof. Dr. M. Vedat AKDENİZ

Co-Advisor : Prof.Dr. A. Şakir BOR

Master of Science : **Metallurgical and Materials Engineering, Middle East Technical University, Ankara, TURKEY, January 1997.**

Thesis : Assessment of Microstructural Effects on Stress Corrosion Cracking Behavior of 4140 and 4340 Steels in a Caustic Solution

Advisor : Prof. Dr. Filiz SARIOĞLU

Bachelor of Science : **Metallurgical and Materials Engineering, Middle East Technical University, Ankara, TURKEY, July 1993.**

- ✓ Graduated from the University as a High Honor Student, having the 2nd highest scholastic degree in the Metallurgical and Materials Engineering Department (Cumulative GPA: 3.52 / 4.00).

HIGHLIGHTS OF SKILLS

- ❖ Knowledge of electron microscopy techniques
- ❖ Hands-on experience in scanning electron microscopy (for at least 3 years)
- ❖ Familiarity with X-ray and electron diffraction techniques, EPMA (Electron Probe Micro Analysis), AES (Atomic Emission Spectroscopy) and various other spectroscopic techniques
- ❖ Hands-on experience in inert gas fusion and combustion analysis techniques for the determination of carbon, sulphur, oxygen, nitrogen and hydrogen in inorganic materials
- ❖ Theoretical and practical knowledge of thermal analyses techniques; hands-on experience in differential scanning calorimetry (for at least 6 years) and dilatometry (for at least 3 years)
- ❖ Hands-on experience in various mechanical testing techniques
- ❖ Advanced knowledge of physical metallurgy; knowledge of thermodynamics, mechanical metallurgy, powder metallurgy and fracture mechanics

LANGUAGES

- ❖ ENGLISH; excellent written and oral skills (got 95 out of 100 in Turkish KPDS Examination (Kamu Personeli Yabancı Dil Bilgisi Seviye Tespit Sınavı); 2009 FALL TERM Examination Result)
- ❖ GERMAN; poor (beginner level)

RESEARCH EXPERIENCE

Doctoral Research: Metallurgical and Materials Engineering, Middle East Technical University, Ankara, TURKEY, 1997-2003.

- ❖ Produced bulk metallic glass alloys mainly in Fe-Zr-B and Fe-C-B based alloy systems by using centrifugal casting method. The latter alloy system was developed originally in this study. Investigated the reasons of the high glass forming ability exhibited by the Fe-Zr-B based alloy system in more detail, mainly in terms of the effects of compositional parameters. Used differential scanning calorimetry (DSC), X-ray diffraction (XRD), scanning electron microscopy (SEM) and transmission electron microscopy (TEM) techniques for structural characterization studies.

Master's Research: Metallurgical and Materials Engineering, Middle East Technical University, Ankara, TURKEY, 1993-1997.

- ❖ Investigated the effects of microstructural variations on the stress corrosion cracking (SCC) behavior of AISI-SAE 4140 and 4340 low-alloy steels in a caustic environment. Used electrochemical anodic polarization tests, fracture mechanical tests and scanning electron microscopy (SEM) to investigate the SCC behavior.

WORK EXPERIENCE

1) RESEARCH ASSISTANT: Metallurgical and Materials Engineering Department, Middle East Technical University, Ankara, TURKEY, 1993-2001.

A. Laboratory Responsibilities

❖ Scanning Electron Microscopy Laboratory, 1997-2001

- Assisted the lab director Prof. Dr. Bilgehan ÖGEL and operator Mr. Cengiz TAN in all lab related works.
- Served as the scanning electron microscope operator as required.
- Prepared the first version of the Scanning Electron Microscopy Lab Web Site.

❖ Mechanical Test Laboratory, 1994-1997

- Assisted the lab director Prof. Dr. Rıza GÜRBÜZ in all lab related works.
- Prepared and delivered the laboratory lectures of the “*Testing and Evaluation of Engineering Materials*” course, given by Prof. Dr. Rıza GÜRBÜZ. Supervised students during laboratory tests. Evaluated and graded lab reports.

B. Courses Assisted

❖ *Phase Transformations*, 1999 – 2000.

4th year undergraduate course given by Prof. Dr. A. Şakir BOR (compulsory course). Main textbook: “*Fundamentals of Physical Metallurgy*”, J. D. VERHOEVEN.

❖ *Physical Metallurgy*, 1999.

3rd year undergraduate course given by Prof. Dr. A. Şakir BOR (compulsory course). Main textbook: “*Fundamentals of Physical Metallurgy*”, J. D. VERHOEVEN.

❖ *Kinetics of Processes in Materials*, 1998.

- Graduate course given by Prof. Dr. Naci SEVİNÇ and Prof Dr. Şakir BOR (compulsory course).
- ❖ *Testing and Evaluation of Engineering Materials, 1994 – 1997.*
Undergraduate/graduate course given by Prof. Dr. Rıza GÜRBÜZ (elective course).
 - ❖ *Mechanical Behavior of Materials, 1994 – 1997.*
3rd year undergraduate course given by Prof. Dr. Alpay Ankara and Prof. Dr. Filiz SARIOĞLU (compulsory course). Main textbook: “*Mechanical Metallurgy*”, G. E. DIETER.
 - ❖ *Basic Concepts in Materials Science, 1994 – 1997.*
2nd year undergraduate course given by Prof. Dr. Filiz SARIOĞLU (compulsory course). Oriented for Mechanical and Aeronautical Engineering. Main textbook: “*Materials Science and Engineering: An Introduction*”, W. D. CALLISTER, Jr.
 - ❖ *Fracture of Engineering Materials, 1994 – 1997.*
Undergraduate/graduate course given by Prof. Dr. Filiz SARIOĞLU (elective course).

2) LECTURER: Metallurgical and Materials Engineering Department, Middle East Technical University, Ankara, TURKEY, Spring 2014.

A. Courses Lectured

- ❖ *Fundamentals of Materials Science and Engineering (METE 230), 2014.*
2nd year undergraduate course (compulsory course). Oriented for Industrial Engineering (compulsory course). Main textbook: “*Materials Science and Engineering: An Introduction*”, W. D. CALLISTER, Jr.

3) CHIEF RESEARCH ENGINEER: TÜBİTAK SAGE (TÜBİTAK Savunma Sanayii Araştırma ve Geliştirme Enstitüsü), Materials Technologies Division, Ankara, TURKEY, 2004 - Present

- ❖ Has been and is being involved in several research and development projects related to the defense industry, with a main focus on guided missiles and munitions (**detailed description of the involved projects unavailable owing to confidentiality requirements**)
- ❖ Within the involved projects, has taken part as a Chief Research Engineer dealing primarily with materials related issues
- ❖ Has gained expertise in the use of various engineering materials in defense industry applications. Engineering materials mainly dealt with include: a) infrared optical materials, b) various kinds of steels, c) cast/wrought alloys based on aluminum, titanium, lithium etc., d) refractory metallic materials (like tungsten) and their alloys, and e) various metal/ceramic/polymer based composite materials
- ❖ Has actively been involved in the design, construction and development of a materials research and development laboratory facility, which is located within TUBITAK SAGE premises. The laboratory facility has constantly been expanded and developed over the years, and has now reached such a mature state that certain defense industry related materials research and development studies can be carried out efficiently within the facility. The laboratory facility is equipped with several manufacturing and

characterization instruments, such as vacuum arc and vacuum induction melting/casting machines, various muffle and tube furnaces with varying charge capacity (majority of them having atmosphere control capability), lab-scale thermo-mechanical processing machines (swager, rolling mill etc.), various powder mixing/comminuting/pressing equipment, metallographic preparation/examination equipment, glove boxes, fume hoods, various spectroscopic and thermal analysis equipment etc. **(detailed description of the laboratory facility unavailable owing to confidentiality requirements)**

- ❖ Has gained hand-on experience in using most of the above-mentioned laboratory equipments
